100% Placement Assistance

Level 1: Introduction to Fundamentals

Introduction to Websites and its Functionalities

Introduction of HTML/CSS

Introduction of Domain name and Web host

Level 2: Basics of Drupal 6.0

Introduction of Drupal

About Installation

Drupal Terminologies

Architecture – Basics – Navigation

Core/Contributed Modules

Theming

Multi-site

Best Practices

Level 3: Advanced Drupal Development

Module Development

High Performance Site

Advanced Architecture

Troubleshooting

Advanced Themeing

Upgrading a Drupal Site

Level 4 - Live International Projects

Course Duration – 12 weeks

Installment fee: Rs 20,000

(in 2 easy installments of Rs 10,000 each)

Prerequisites: Basics PHP

Ruby on Rails (Advanced)

100% Placement Assistance

Level 1: Introduction to Fundamentals

Introduction to Websites and its Functionalities

Introduction of HTML/CSS

Introduction of Domain name and Web host

Level 2: Basics of Ruby on Rails

Rails features and capabilities

Evolving database schema with Rails migrations

Sending E mails with Rails

Implementing Rails plug-in

Making basic Applications in Rails

Level 3: Advanced Ruby on Rails

Introduction to Ajax with Rails

Introduction to RJS

Extending your Rails applications

Web services and Rails

Meta-programming with Rails

Extending Rails with plug-in

Introduction to Capistrano

Advanced Ruby on Rails development

Level 4 - Live International Projects

Course Duration - 12 weeks

Installment fee: Rs 20,000

(in 2 easy installments of Rs 10,000 each)

Prerequisites: Basics, C, C++

Linux Administration

100% Placement Assistance

Level 1: Introduction to Fundamentals

Introduction to Websites and its Functionalities

Introduction of HTML/CSS

Introduction of Domain name and Web host

Level 2: Linux /Web Administration

Fundamentals about Linux System

Server Setup

DNS Clustering

Load Balancing

Database Clustering

Understanding cPanel & Plesk

Best Practices in Infrastructure Monitoring

Level 3 - Live International Projects

Course Duration – 12 weeks

Installment fee: Rs 20,000

(in 2 easy installments of Rs 10000 each)

Prerequisites: Linux Fundamentals

Advanced PHP MySQL Programming

100% Placement Assistance

Level 1 Basics of PHP

PHP Language

PHP Variable

PHP Functional Basics

PHP Programming Basics

PHP Web Basics

PHP Database Basics

PHP Applications Basics

Level 2: PHP / MySQL Programming

Introduction to PHP/MySQL

Variables and Expressions

Conditional Tests and Events

Flow Control

PHP Configuration

PHP Function

PHP using Array

Handling Database with PHP

String Manipulation

Sessions and Cookies

File and Directory access using PHP

Object Orientation using PHP

SOAP

Level 3 - Live International Projects

Course Duration – 12 weeks

Installment fee: Rs 20,000

(in 2 easy installments of Rs 10000 each)

Prerequisites: C, C++, HTML

MYSQL Programming

100% Placement Assistance

Level 1 Fundamental of MYSQL

Introduction of MySQL

Features and Benefits

Installation and MySQL Server

Relational Databases

SQL/MySQL languages

Database Design of MySQL

Structure of MySQL

Level 2 – MySQL Programming

The MySQL Client Program and Connectors

Data Types including Bit and Binary

Managing Databases, Tables, Indexes and Views

Retrieving and Aggregating Data

Advanced SQL Expressions and Functions

Modifying, Importing and Exporting Data

Complex Joins and Sub Queries

Use Variable Syntax and Properties

Prepared Statements

Stored Routine Definition

Creating, Dropping and Altering Stored Routines

Invoking Stored Routines and Triggers

Obtaining Database Metadata

Debugging MySQL Applications

Optimization Principles

Storage Engines

Course Duration – 10 weeks

Installment fee: Rs 15,000

(in 2 easy installments of Rs 7,500 each)

Prerequisites: Basics of Database Mgmt

AJAX

Introduction of AJAX

Introduction to DOM

Introduction to CSS

Ajax an abstract view

The HTML Document Object Model

XML Basics

Web Services

XML and Ajax

Java Script and Refactoring Ajax

JavaScript Object Notation (JSON)

Data Manipulation Statements

Principle Experience using Ajax

Control Statements

Course Duration – 3 weeks

Installment fee: Rs 10,000

(in 2 easy installments of Rs 5,000 each)

Prerequisites: JavaScript, HTML, Any Server Scripting Language

Ruby on Rails (Beginners)

Level 1: Introduction to Fundamentals

Introduction to Websites and its Functionalities

Introduction of HTML/CSS

Introduction of Domain name and Web host

Level 2: Basics of Ruby on Rails

Rails features and capabilities

Evolving your database schema with Rails migrations

Sending E mails with Rails

Implementing Rails plug-in

Making basic Applications in Rails

Course Duration – 6 weeks

Course fee: One time fee: Rs 10,000

PHP (Beginners)

Level 1: Introduction to Fundamentals

Introduction to Websites and its Functionalities

Introduction of HTML/CSS

Introduction of Domain name and Web host

Level 2 Basics of PHP

PHP Language

PHP Variable

PHP Functional Basics

PHP Programming Basics

PHP Web Basics

PHP Database Basics

PHP Applications Basics

Course Duration – 6 weeks

Course fee: One time fee: Rs 10,000

Drupal 6.0 (Beginners)

Level 1: Introduction to Fundamentals

Introduction to Websites and its Functionalities

Introduction of HTML/CSS

Introduction of Domain name and Web host
